

## AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions and listings of claims:

### LISTING OF CLAIMS

1 - 33. (cancelled)

34. (currently amended) ~~The device of claim 27~~ An atherectomy device comprising:

a catheter having a proximal and a distal end and a lumen therebetween;

a support structure in the lumen adjacent the distal end;

one or more optical conduits in the catheter, each having a distal end supported by the support structure;

one or more magnetic members disposed in the distal end of the catheter;  
and

wherein the one or more ~~energy~~ optical conduit distal end is rotatable within the support structure.

35. (currently amended) ~~The device of claim 27~~ An atherectomy device comprising:

a catheter having a proximal and a distal end and a lumen therebetween;

a support structure in the lumen adjacent the distal end;

one or more optical conduits in the catheter, each having a distal end supported by the support structure;

one or more magnetic members disposed in the distal end of the catheter;  
and

wherein the one or more ~~energy~~ optical conduit distal end is rotatable within the support structure within the catheter.

36. (currently amended) The device of claim [27] 35, wherein the support structure comprises the one or more magnetic members.
37. (currently amended) The device of claim [27] 36, wherein the support structure comprises a sheath.
38. (currently amended) The device of claim [27] 37, wherein the device comprises a laser ablation tool.
39. (currently amended) ~~The device of claim 27~~ An atherectomy device comprising:  
a catheter having a proximal and a distal end and a lumen therebetween;  
a support structure in the lumen adjacent the distal end;  
one or more optical conduits in the catheter, each having a distal end supported by the support structure;  
one or more magnetic members disposed in the distal end of the catheter;  
wherein the one or more magnet members are positioned within ~~in a wall~~ of the catheter and are rotatable within the catheter.
40. (currently amended) The device of claim [27] 39, further comprising an ablation member at the catheter distal end.
41. (currently amended) The device of claim [40] 40, wherein the one or more magnet members are comprised by the ~~ablation member~~ support structure.
42. (currently amended) The device of claim [27] 41, wherein the support structure comprises a passage for a guidewire.
